

Suma[®] Freeze

Ready-to-use deep freezer cleaner

Description

Suma Freeze D2.9 is a ready-to-use product for the manual or automatic cleaning of all types of surfaces encountered in deep freezers, including floors, walls and doors, at temperatures down to -25°C.

Key properties

Suma Freeze D2.9 is a ready-to-use cleaner suitable for all surfaces in deep freezers. A special blend of solvents makes it suitable for temperatures down to -25°C. The selected blend of surfactants ensures very efficient cleaning even at low temperatures.

Benefits

- Product can be used without prior thawing of the freezer.
- No dilution necessary, since it is ready-to-use.
- High cleaning power due to highly active ingredients.
- Useable on all commonly in freezers encountered materials, which are resistant to solvents.
- Suitable in combination with wet-vacuum machines.

Use instructions

Preparation:

To ease the cleaning process, create as much empty space as possible (segregate the food stuff). Cover all food stuff and sweep the floor. Thick layers of ice (>3 mm) must be removed mechanically (ice scraper) prior to the cleaning.

Cleaning:

1. Apply **Suma Freeze D2.9** undiluted on the surface to be cleaned. On vertical surfaces neat product can be applied with a sponge.
2. Clean with a brush. Loosened soil can be removed with absorbent cloth or paper.

For the cleaning of larger floor surfaces the use of a single disc machine with a Nylon scrubber brush is possible. A wet vacuum cleaner can be used to remove the soil and liquid from the floor.

The cleaning should be done at least every three months.

Recommended usage

Do not dilute the product with water!

Normal soiling: 150-200 ml / square meter.

Heavy soiling: 200-400 ml / square meter.

D2.9

Suma[®] Freeze

Ready-to-use deep freezer cleaner

Technical data

Appearance	Clear liquid
pH neat	11.4
Relative density [20°C]	1.03

These figures are typical values and should not be interpreted as specifications.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

Store in original container. Avoid extremes of temperature.

Product compatibility

When used as recommended, **Suma Freeze D2.9** is suitable for use on stainless steel and tiled surfaces in the deep freezer.
