

Clax 100 S

Surfactant booster

Description

Clax 100 S is a liquid surfactant booster based on a blend of surfactants.

Key properties

Clax 100 S is an effective booster based on a blend of nonionic surfactants. This product shows excellent performance on fatty/oily soil. Once removed from fabric, fat and oil are effectively dispersed by **Clax 100 S**, thus preventing redeposition.

Clax 100 S is mainly used in conjunction with alkalinity boosters and/or mainwash detergents. In combination with the latter its main function is to improve dispersion of fatty and oily soil, thus enhancing wash performance on heavily soiled goods such as cotton and polyester/cotton workwear and tablelinen.

The absence of optical brightener renders this product suitable for use on pastel coloured fabric.

In addition **Clax 100 S** can be used for special applications such as clean room processes.

Benefits

1. Excellent performance on fatty and oily soil
2. Good foam control properties - optimal use of washer mechanical action
3. Suitable for use on pastel coloured fabric

Use instructions

Dosing levels are dependent on wash classification.

Recommended dosage:

Soil level	Dosage (ml/kg dry goods)
Light	1.5 – 3.0
Medium	3.0 – 6.0
Heavy	5.0 – 12.0

Technical data

Appearance	Clear colourless liquid
pH [neat product]	7.5
Relative density [20°C]	0.985
Viscosity [mPA.s;25°C]	50

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Store in original closed containers or (where applicable) in an approved bulk tank, away from extremes of temperatures.

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.
