

## Clax Extra

High performance fabric washing powder, especially suitable for low temperatures

### Description

**Clax Extra** is a complete mainwash detergent specially formulated for use in commercial and on premise laundries. The product has been developed for automatic and manual dosing and can be applied at all water hardnesses. **Clax Extra** is suitable for washing all white cotton and polycotton fabrics and colourfast articles.

### Key properties

**Clax Extra** is a strong enzymatic detergent powder, based on an effective blend of surfactants, water hardness sequestrants, anti-greying and anti-corrosion agents, alkaline salts and medium temperature bleach system.

The well-balanced surfactant blend results in excellent fatty/oily and particulate soil removal and dispersion of soil components. The strong phosphate based building system ensures low water hardness ion concentration and consequently prevents precipitation of detergent components. Phosphates also function as anti-greying agents by keeping soil particles in suspension (prevents redeposition). In addition other ingredients with anti-redeposition and anti-incrustation properties have been included in the product.

**Clax Extra** has also been formulated with silicates, which function as anti-corrosion agents, and optical brightener ensuring long-lasting whiteness of fabric. The product contains a bleach system for application at medium temperatures (50 – 70 °C) and bleach stabilising agents, preventing fabric damage. Presence of an effective proteolytic enzyme system leads to protein degradation, thus facilitating removal of proteinaceous soil such as blood and food stains.

**Clax Extra** is a very effective single shot mainwash detergent, which may be used for cleaning fabric from hospitals and other healthcare establishments as well as for cleaning hotel linen, restaurant linen and workwear.

### Benefits

- Excellent performance on a wide range of stains and types of soil
- Prevents greying of linen; stabilisation of soil particles in the wash liquor
- Effective medium temperature bleaching (minimal fabric damage)
- Ensures long-lasting whiteness
- Prevents corrosion of machine parts
- Very effective on proteinaceous soil (e.g. blood and food stains)

### Use instructions

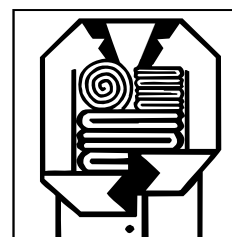

Dosage recommendation:

Please refer to dosing matrix on label of bag.

For best results:

- Use softened water
- Segregate polyester cotton articles from other articles and wash separately
- Separate white and coloured goods
- Sub-sort into light, medium and heavily soiled articles

## Clax Extra

### Technical data

Appearance	Blue-gree bar,perfumed white powder
Total alkalinity [% Na <sub>2</sub> O;pH 3.6]	9.4
pH [1% solution]	10.5
Bulk Density [g/l]	650
Available Oxygen [%]	2.0

The above data is typical of normal production and should not be taken as a specification.

### Safe handling and storage information

Store in original bags, away from extremes of temperatures.

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

### Existing Package Sizes

Code	Package Size
7508420	20KG
