

TASKI® Jontec Terranova

F9f

Liquid Crystallizer

Description

TASKI®Jontec Terranova F9f can be used for the crystallization of all calcareous stone floorings such as marble, travertine, calcareous terrazzo, etc.

Benefits

- Maintains the natural appearance of stone.
- Prolongs the life of stone floors.
- Provides a slip resistant finish.
- Increases shine.
- Facilitates daily cleaning and maintenance.

Properties

- TASKI®Jontec Terranova F9f is a fluosilicic acid based product for the crystallization of all calcareous (containing calcium) stone floorings, such as marble, travertine, solnhofer, etc. as well as calcareous terrazzo.
- Crystallization positively influences the value, life span and natural appearance of the stone flooring.
- Other proven advantages are an increase in shine and improved tread properties. The glide values obtained after crystallization (according to the application recommendations) with TASKI®Jontec Terranova F9f indicate that the stone floor is very slip resistant.

Use Instruction

Dilution:

- The product is ready to use and should not be diluted.

Preparation:

- Remove all soil, wax, oil, grease residue with Diversey products.
- Thoroughly rinse the floor with water and allow to dry completely.

Application:

1. TASKI®Jontec Terranova F9f is applied with a single disc machine and steel-wool / bronze pads. Sparingly (max. 2-3 triggers of the spray device/m²) apply the product with a spray device or a hand sprayer and distribute with a single disc machine (150- 200 rpm) by moving in circular motions until thoroughly absorbed and dry. A slight shine will be achieved.
2. If a shinier surface is preferred, recrystallize the area once more with 3 triggers/sq.m and distribute with a single disc machine until thoroughly absorbed, dry and shiny.
3. All abrasives and pad residue must be removed after crystallization by careful damp mopping or wet cleaning with a 1% solution of TASKI R2. If a deeper shine is desired, the floor can then be buffed with a white pad and a high speed machine (eg. TASKI Ergoduo or TASKI Ergodisc 1200).

TASKI® Jontec Terranova

F9f

Liquid Crystallizer

Maintenance

- Damp mopping: Clean heavily soiled floor with a 1% solution of TASKI R2 / STRIDE.
- Do not use any products containing wax, soap or acrylates.

Product Consumption

- 1 litre TERRANOVA for approx. 100 sq.m

Technical Data

Appearance	Specific gravity (25°C)	pH [neat]
Bluish pink, turbid liquid	1.120 – 1.160	1.00 – 1.80

Item code and available pack size

Product	Pack size	Item code	Shelf life
TASKI® Jontec Terranova	2 x 5 L	4488883	2 years

Machine / Tools

- Single disc machine (150-200 rpm).
- Spray device or hand sprayer.
- Pads.

Important Advice

- Shake well before use. Apply only on calcareous stone floors.

Safe handling and storage information

- Full guidance on the handling and disposal of this product is provided in a separate safety data sheet.
- Store in original container. Avoid extremes of temperature and humidity.

Safety Reminder

Please make sure your employees read and understand the product label and Safety Data Sheet before using this product. The label contains directions for use, and both the label and SDS contain hazard warnings, precautionary statements and first aid procedures. Improper use or dilution may result in damage to surfaces and may result in health and physical hazards that match those of the concentrate.
