

CLAX® Alfa

31A1

Detergent-base

Description

Clax Alfa is a liquid surfactant booster based on a blend surfactans.

Key properties

Clax Alfa is an effective booster based on a blend of nonionic surfactants, anionics. This product shows excellent performance on fatty/oily soil. Once removed from fabric, fat and oil are effectively despersed by **Clax Alfa**, thus preventing redeposition. The presence of anionic improves particulate soil removal.

Clax Alfa is mainly used in conjunction with alkali/build boosters. This combination of products ensures good removal and dispersion of fatty and oily soil, thus enhancing wash performance on heavily soiled goods such as cotton and polyester/cotton workwear and table linen.

In addition **Clax Alfa** contains optical brighteners for application at all temperatures, which are stable in the presence of chlorine bleach.

Benefits

- Excellent performance on fatty and oily soil.
- Goos foam control properties-optimal use of washer mechanical action.
- Ensures long-lasting whiteness (efficient optical brighteners).

Use instructions

Dosing levels are dependent on wash classification.

Recommended dosage is 2 - 4 g/kg dry goods and 4 - 9 g/kg dry goods for prewash and mainwash respectively.

Alfa

31A1

Technical data

Appearance	: Opalescent white liquid
pH (neat)	: 7.2
Relative density [20°C]	: 0.997
Viscosity [mPa.s; 25°C]	: 85

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet; sds. Store in original closed containers away from extremes of temperature.

Only for professional users/specialists.
